P R E F A C E

Tubular Running Services — These services consist of a wide variety of tubular connection and installation services for the drilling, completion and workover of an oil or natural gas well. We are a significant market player in tubular running services.

Offering an integrated package of total tubular services management, we provide tubular handling, preparation, inspection and wellsite installation services from a single source.

As a provider for rig mechanization technology used for the installation of tubing, casing and production risers, we offer a suite of services for improving rig floor operations by reducing personnel exposure, increasing operational efficiency and improving safety.

We offer computerized torque monitoring and testing services to ensure the integrity of tubular connection makeup. We also specialize in critical-service installations where operating conditions, such as downhole conditions and/or metallurgical characteristics,

call for specific handling technology. Finally, our tubular running services integrate with other service lines, such as high-grade completion equipment installation services.

QHSE SYSTEM REQUIREMENT

QHSE

QHSE SYSTEM REQUIREMENTS

QHSE

Our perates an integrated management sestem (ims) at all operational facilities to meet Their business legal and moral hseq obligation all personal are requir ed to work in Full compliance with the requirements set out in our company ims thes will include as a Minimum.

Ensuring that work is carried out in compliance with companys quality, health safety and environmental policies and procedures.

Not undertaking any task for which authorization and ,or training has not been given .

Ensuring the highest standaed of workmanship produced is in accordance with the company expectations and as per customer standards and specification.

Promoting good health ,safety and environment practices throughtout all company activities.

Wearing the assigned personal protective equipment required.

Taking caer to prevent harm to themselves, colleagues and otheres and the environment that may be caused by our acts or omissions.

Keeping the work area neat, organzed & free of trip and other hazards.

Reporting hazards plant, equipment and other work place, or short comings in the existing controls, to a superior without delay.

Supporting continual improvement of the integrated management sestem by expressing better and safer ways to perform tasks and improve policies and procedures.

Participate in hseq training required to meet minimumv identified for position undertaken attending toolbox talks ,hseq meetings and trainings as and when required.

HSEQ AUTHORITY

To report any unsafe behaviors to their immediate supervisor or safety representative , when there may by conflict report directly to facility hseq manager .

Authority on QHSE grounds to stop operation or delivery of product on the existence of an immediate risk of harm to personnel or environmental pollution and damage to property.

TRS EQUIPMENT

TRS EQUIPMENT

KOH Contracting, Oil & Gas Services deliver the safest and most efficient services by using tubular running technology and a new range of handling equipment.

Running Service

Remote operated and conventional power tongs

Casing and tubing running and recovery

KOH Contracting, Oil & Gas Services is providing equipment, often self-developed in close cooperation with collaborative vendors. As a result, KOH Contracting, Oil & Gas Services is experiencing ongoing growth in the range of services.

Casing power tong with six cylinder power unit.

Tubular handling equipment

Casing Running Tool

Torque turn computer service

Integrated Safety Innerlook System (ISIS).

The equipment and personnel will be charging from the departure date until the Return date to our base.

- Equipment Description:

POWER UNIT

POWER TONG

CTM JAM UNIT

SPIDER SLIPS

SPIDER ELEVATOR

SIDE DOOR ELEVATOR

ROTARY HAND SLIPS

HYC ELEVATOR

TORQUE GAUGE WITH LOAD

SEAL STABBING GAUGE

SINGLE JONIT ELEVATOR

THERAD PROTRACTOR

2 WAY SLING

SAFETY SLING

- SERVICE PERSONNEL

CROW SUPERVISOR

CTM JAM TECHNICIAN

TONG OPERATOR

STABBING OPERATOR

TUBULAR PROGRAMS

TUBULAR PROGRAMS

KOH tubular management services increase operational efficiency by extending tubular running services further upstream into offline operations off the critical path. This streamlined process eliminates much of the logistical and handling cost associated with your tubular programs.

Our fully integrated, mechanized, rig-ready packages used in the makeup and handling of casing, tubing, and drillpipe, enhance wellsite safety and operational efficiency.

KOH tubular management services combine our upfront engineering expertise staff, well construction technologies, and top-drive tubular running to deliver high-integrity service.

Our experienced staff delivers quality and reliability in tubular running equipment by using the latest technologies.

MINIMIZE RIG TIME WITH THE TUBING RUNNING SERVICE

MINIMIZE RIG TIME WITH THE TUBING RUNNING SERVICE

KOH tubular running services are the right choice for efficient tubular running. When you need expert handling of exotic chrome tubulars, for any job from the simplest to the most challenging, we have the answer that minimizes rig time.

The field-proven, fully integrated chrome running system enables handling and makeup of chrome tubulars. The system does not leave die marks that damage chrome tubulars and degrade performance.

For accurate torque measurement, KOH tubular running system minimize cost by ensuring the correct torque is applied and faulty connections are immediately detected.

OUR EXPERIENCE

OUR EXPERIENCE

We have a very good team with long experience in tubular running service (TRS) Working in major sites Iraq, Saudi Arabia, Yemen (EXON MOBIL, SHELL, KUWEIT ENERGY, BRITICH PETROLEM, PETRONASS, LOCK OIL GAZPROM, SIPC, OIL SEARCH, HALLIBURTON, BACKER HUGTH, OMV, CANADIAN OXY, CANADIAN NEXEN, TOTAL E&P YEMEN, DOVE ENERGY, DNO, CALVALLY.)

Our team have running all sizes of casing & tubing (20, 18 5/8 13 3/8, 10 3/4, 9 5/8, 7 5/8, 7 5.5, 5, 4.5, 4, 3.5, 2 7/8 2 3/8)

Our team has long experience in oilfield in all drilling rig service rigs inshore & offshore.

Our teams can run with computer torque monitoring all sizes casing & tubing
